

FastBooking Updater

Update your rates and availability simultaneously on all Internet distribution sites

FastBooking Updater is a powerful Internet-based channel management solution with elaborate updating options. The system enables hoteliers to update their rates, availability and many more options across all their distribution websites from a single interface.

“Updater has simplified my extranet pricing and availability process enormously. Thanks to the user-friendly interface and the functionality of FastBooking Updater, I save hours every day.”

Isabella Bachkoenig
Revenue & Reservations Manager
Grand Hotel Wien
Austria

Save time! Manage all your rates and channels from a single screen

FastBooking Updater saves you more than 40 minutes a day. That's three hours each week! With FastBooking Updater, you will no longer need to login individually to each channel's extranet in order to change your rates and availability. All your extranet data can be viewed and modified from a single interface with a single login.

Improve reactivity to market changes

FastBooking Updater enables you to change your rates in record time. Sophisticated updating tools help you boost your performance and react faster to new market trends.

Ensure full rate parity across the Internet

With just a single click, you can synchronize your hotel website Best Rate (on the FastBooking Engine) with your rates on all the distribution sites connected in the Updater. You're sure to have full rate parity across the Internet.

Follow your performance and increase your profitability

Regularly scheduled Availability Reports and Alerts in FastBooking Updater help you track your hotel's productivity on each channel. Use Updater together with our powerful Channel Profit Optimization option and you can retrieve all

the bookings made on your distribution websites along with reports to help you interpret the data.

Fully customizable to your needs

It only takes 20 minutes of training to use FastBooking Updater. FastBooking Updater offers a wide range of options to personalize your setup.

Dedicated customer support

Your personal account manager and our technical support team are there to help you every step of the way. Your account manager will assist you in setting up the system including pre-configuring periods, grouping your rooms and channels into categories, and linking packages and promotions to other room types using formulas to allow automatic updates. Your account manager is available to answer questions and can be contacted via your personal support mailbox accessible from within the Updater interface.

Fully integrated with the FastBooking services platform

FastBooking Updater interfaces seamlessly with the FastBooking Checker and the FastBooking Engine. Use it together with additional FastBooking services to strengthen your online strategy: FastBooking Website Package, Hotel Traffic Builder, Web Traffic Builder, Social Media, Mobile applications and sites, and more.

A simple solution for multiple distribution channel updates

A clear, user-friendly interface

- A redesigned interface makes for smoother navigation within the system.
- All extranets are visible in a single table on the same screen so there's no need to go through each extranet individually.
- The user experience is more enjoyable and work efficiency is vastly improved.

Multiple functions to update rates and allotments

- **FastInput** modifies a rate or availability for specific dates on the same room category across all channels.
- **One Click Parity** synchronizes public prices used in your FastBooking Engine and applies them automatically to all chosen distribution sites guaranteeing rate parity across all websites.
- To closely monitor your inventory, the upload confirmations are sent to you by email.
- You can schedule **Availability Reports** to see an overview of the situation every morning.

Channel Profit Optimizer supports yield management decisions

- Channel Profit Optimizer (CPO) integrates and stores all reservations made on your distribution sites in a single database.
- CPO provides at-a-glance visibility of channel performance for your hotel and hotel performance on each channel.
- CPO creates standard and custom reports to help you better manage your offer:
 - **View Bookings Report** shows you all bookings made on each site with key information which can be used to create rooming or mailing lists.
 - **Daily Pick-up Report** shows you the rhythm of your reservations so you can calculate the booking window on each site, identify peak seasons and set rate restrictions.
 - **Statistics Report** shows you the split of bookings, nights and revenue per channel.
 - Use **Datamining** to create your own reports.
